MELUN · WIG INSTALLATION & VIRGIN HAIR

Valuation Report Professional Website

Alfred Ahoussinou

July 2026

Prepared for: Ola / XOhair

CONFIDENTIAL DOCUMENT

xo-hair-melun.netlify.app

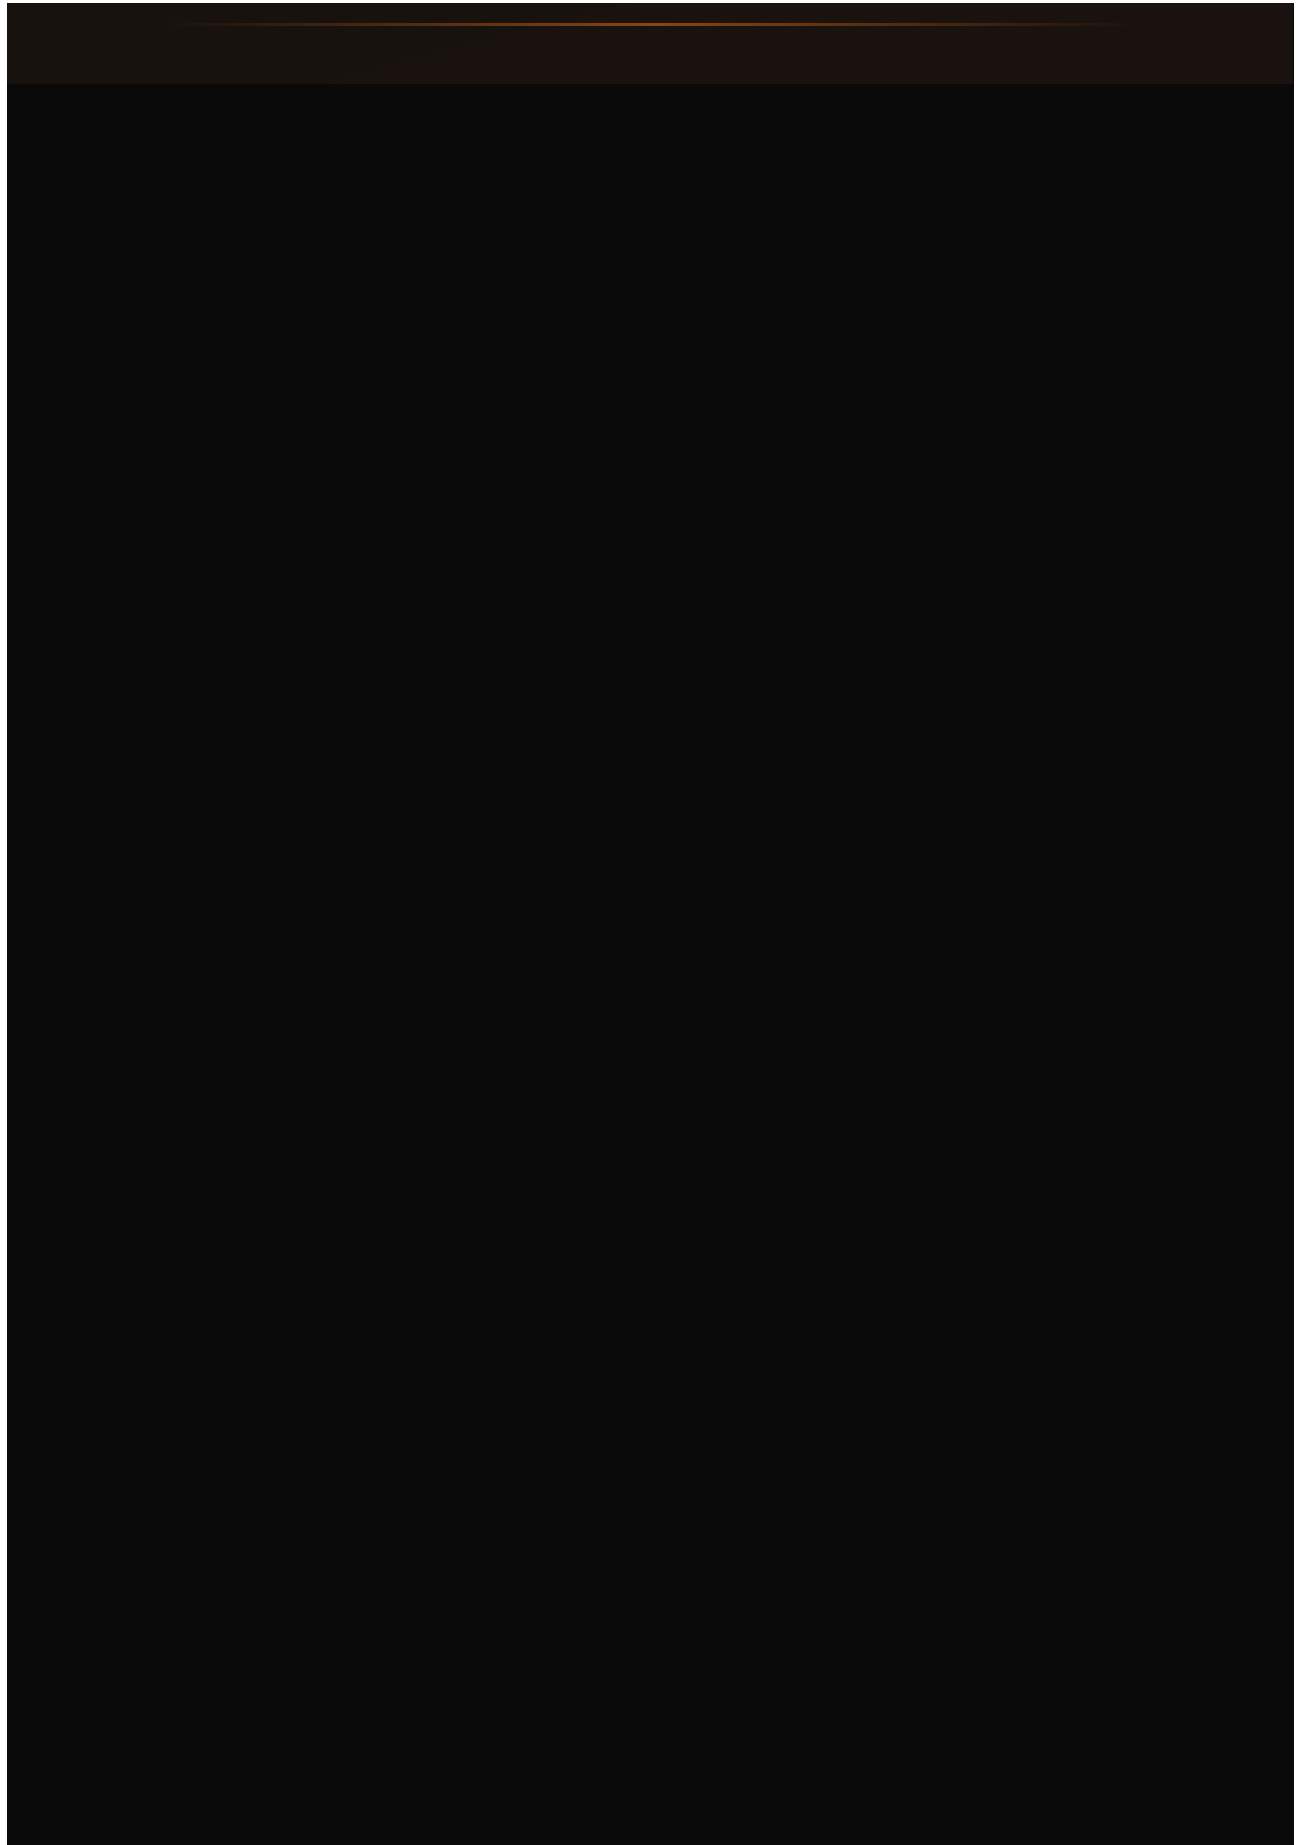

Table of Contents

This report presents the market value of the XOhair Melun website, a detailed functional breakdown of the deliverable, a comparison with the French market, and the context of the symbolic price agreed with Ola.

1. Executive summary
2. XOhair project overview
3. Site architecture diagram
4. Detailed feature inventory
5. Market comparison — price ranges
6. Detailed valuation (€2,000 – €4,500)
7. Junior developer rate (€1,500 – €3,000)
8. Price agreed with Ola: €200
9. Included / not included
10. Customer journey diagram

Purpose of this document — Informational report (not a legal contract) intended to clarify the real value of the delivered project and the exceptional nature of the €200 amount. For day-to-day site usage, refer to the Ola Guide and the XO-HAIR-docs repository.

I. Executive summary

The **XOhair Melun** website is a professional, fully custom web application deployed in production on Netlify. It combines a polished storefront (video hero, service and wig catalogues, policies, Melun RER location) with a complete online booking system, an admin area for Ola, automated emails via Brevo, and a PayPal/Revolut deposit module.

€2,000 – €4,500

Estimated market value

€1,500 – €3,000

Typical junior rate

€200

Price agreed with Ola (symbolic)

For an equivalent deliverable on the French market, value typically ranges from **€2,000 to €4,500**. As a developer in the early stages of his career, a already reduced rate would be **€1,500 to €3,000**. Alfred nevertheless transfers the entire project to Ola for **€200** — a friendly gesture that does not reflect the real value of the work completed.

In short: Ola receives a professional, turnkey tool (storefront + booking + admin + emails + deposit), operational and documented, for an amount representing approximately 4 to 5% of the low end of market value.

2. XOhair project overview

Context

XOhair is Ola's hair salon in **Melun (77000, France)**, specialising in melted lace wig installation, hair customisation, and Virgin hair extensions. Trained in London, Ola offers premium services in a professional setting, easily accessible from Paris via **RER D and R line** (Gare de Lyon → Melun).

Website objectives

OBJECTIVE	IMPLEMENTATION
Professional visibility	Elegant black & copper storefront, 8-clip video hero, service and wig catalogues, consistent visual identity
Reduce manual exchanges	24/7 online booking with time slots calculated automatically based on salon hours
Centralise management	Admin area: dashboard, calendar, accept/decline, CSV export of appointments
Automate communication	Transactional emails via Brevo (4 HTML scenarios) with fallback relay
Secure bookings	€10 deposit via PayPal or Revolut before final confirmation
Inform clients	Clear policies (cancellation, lateness, appointment preparation) available online

Technical stack

COMPONENT	TECHNOLOGY
Framework	Next.js 15 (App Router) + React 19 + TypeScript
Hosting	Netlify (automatic builds, Netlify Blobs for data persistence)
Emails	Brevo (REST API) with Resend fallback
Payments	PayPal.me and Revolut.me links (€10 deposit)
Source code	Private GitHub repository XO-HAIR
Documentation	Public repository XO-HAIR-docs (operational guides, no secrets)

Live site: xo-hair-melun.netlify.app · **Instagram:** @xo.haiir

3. Site architecture diagram

The diagram below illustrates the overall flow: from the visitor on the site to emails, payments, and admin management.

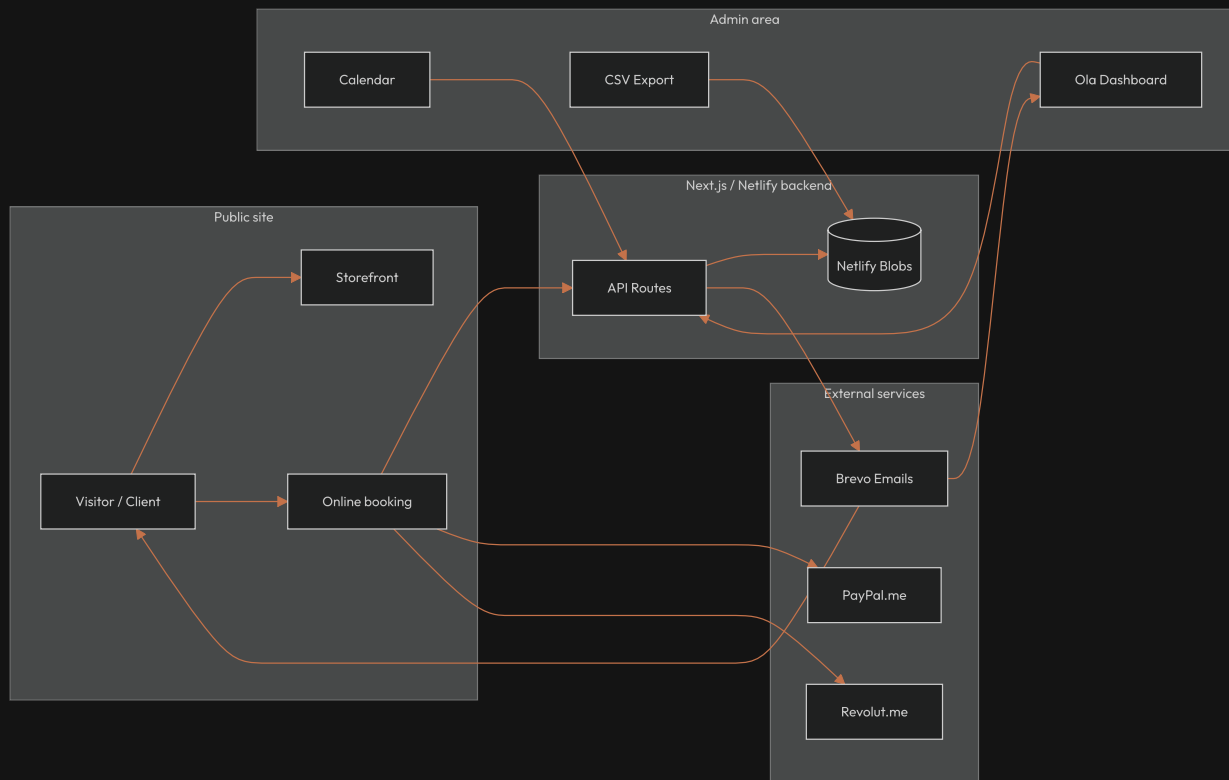

Figure 1 — Functional architecture of the XOhair Melun website

Reading the diagram: the client browses the storefront or goes directly to booking. Available slots are calculated in real time via the API (no CDN cache). Each request is stored in Netlify Blobs, triggers Brevo emails, and appears in Ola's admin. The deposit is paid via configurable PayPal or Revolut links.

- ▶ No dependency on third-party booking SaaS (Calendly, SimplyBook, etc.)
- ▶ Data hosted on Netlify Blobs — full control by Ola via the admin
- ▶ Dual email channel (Brevo + fallback) for notification reliability

4. Detailed feature inventory

Complete inventory of **13 modules** delivered, with estimated market value per component.

MODULE	FEATURE	CONCRETE DESCRIPTION	EST. VALUE
Storefront	Video hero	8 MP4 clips, crossfade, posters, London UK / Melun RER D & R badges, Book + Instagram CTAs	€350–600
Storefront	Services	10 detailed services (price, duration, inclusions), 8 bookable online, pre-filled Book button	€200–400
Storefront	Wigs	7 visual models, pricing grid 6 categories × 6 lengths (€125–200), pre-order banners	€250–450
Storefront	Gallery	Infrastructure for 96 synced Instagram reels, gallery page with CTA to @xo.haiir	€150–300
Storefront	Info pages	About, 5 appointment policy sections (accordion), Melun location, per-page SEO	€150–250
Booking	Calendar	3-step form, monthly calendar, 30-min slots, 24h notice, 60-day horizon, overlap handling	€500–900
Booking	Brevo emails	4 HTML email types: request received, Ola alert, confirmation (+ deposit links), decline; fallback relay	€200–400

MODULE	FEATURE	CONCRETE DESCRIPTION	EST. VALUE
Admin	Dashboard	Stats, week view, daily schedule, monthly calendar, day/slot/week blocking	€400–700
Admin	Appointment mgmt	Search, filters, sorting, bulk actions, internal notes, status history, resend email	€300–500
Admin	Hours & CSV	Working days, breaks, slot interval settings; UTF-8 CSV export (semicolon separator)	€150–300
Payments	Deposit	Configurable PayPal.me + Revolut.me links, success page, email and policy integration (€10)	€100–200
Infra	Netlify	Next.js build, environment variables, security headers, Blobs persistence, netlify.app domain	€150–300
Docs	Ola guides	GUIDE-Ola, admin, hours, Brevo, payments, policies — XO-HAIR-docs repository	€100–200
Estimated total (sum of modules)			€3,000 – €5,300

The range retained in section 6 (**€2,000 – €4,500**) incorporates negotiation margin and realistic positioning for a solo project, without agency or project management fees.

5. Market comparison — price ranges in France

Reference points from the French web market (2025–2026) for comparable services.

SERVICE TYPE	PRICE RANGE	TYPICALLY INCLUDES
WordPress / Wix showcase site	€800 – €2,000	Template, 5–8 pages, contact form, hosting sometimes included for 1 year
Custom showcase site (Next.js)	€1,500 – €3,500	Custom design, responsive, basic SEO, no back-office
Booking SaaS or custom integration	€500 – €1,500	Time slots, reminders — often limited customisation
Custom admin back-office	€800 – €2,000	Dashboard, CRUD, authentication, data export
Transactional emails	€200 – €500	HTML templates, provider (Brevo, SendGrid), 3–5 scenarios
Full agency package	€3,000 – €8,000	Storefront + booking + admin + emails + 3–6 months support
Junior freelancer	€1,500 – €3,000	Reduced rate, portfolio under construction
Experienced freelancer	€3,500 – €7,000	Robust deliverable, documentation, best practices

The XOhair project falls into "**custom storefront + booking + admin + emails**", typically billed at **€2,500 – €5,000** by an experienced freelancer or small agency.

6. Detailed valuation (€2,000 – €4,500)

MODULE	RANGE	JUSTIFICATION
Complete storefront	€700 – €1,200	8-clip hero, catalogues, policies, SEO, consistent black/copper design
Booking system	€600 – €1,100	Real-time calendar, business rules (durations, overlaps, notice), dedicated API
Admin area	€500 – €900	~2,450 lines: dashboard, calendar, bulk actions, hours settings
Automated emails	€200 – €400	4 HTML scenarios, Brevo + Resend fallback, relay to Ola
Payments & policies	€100 – €200	Integrated deposit, legal pages, consistent client journey
Hosting & deployment	€150 – €300	Netlify, Blobs, production configuration
Documentation & handover	€100 – €200	Operational guides, public docs repo, initial onboarding
Total	€2,350 – €4,300	Commercial rounding: €2,000 – €4,500

Value drivers: 100% custom development (no Calendly), rich admin panel, dual email provider, Instagram pipeline (96 reels), operational and tested production environment.

7. Typical rate for a junior developer (€1,500 – €3,000)

Alfred Ahoussinou is in the **early stages** of his career as a web developer. For a junior profile with a portfolio under construction, the market generally accepts rates 30 to 40% lower than an experienced freelancer.

CRITERION	IMPACT ON RATE
Limited portfolio	Lower range accepted by early adopter clients
Need for references	Preferential rate in exchange for testimonial / recommendation
Learning curve included	Research and iteration time not billed at senior rate
Relationship of trust	Project delivered in a friendly / family context

Honest range for this profile: €1,500 – €3,000 — even at this "junior" rate, the XOhair project remains below typical market value given its functional depth.

8. Price agreed with Ola: €200

Despite a valuation of **€2,000 – €4,500** (or **€1,500 – €3,000** at junior rate), Alfred transfers the entire project for:

€200

Symbolic price — friendly gesture and support for the launch of XOhair. This amount is not a commercial assessment of the work completed.

IN CONCRETE TERMS	EQUIVALENCE
€200	Approximately 4 to 5% of the low end of market value
Time invested	Several weeks: development, design, testing, deployment, documentation
What Ola receives	Professional turnkey tool, operational, avoiding months of manual appointment management
Not billed	Iterations, Brevo/Netlify setup, guide writing, initial support

9. Included / not included

✓ Included in handover

- Live site (Netlify)
- Full source code — private XO-HAIR repo
- Complete admin (dashboard, calendar, CSV)
- Brevo emails (4 scenarios)
- Storefront pages + booking module
- PayPal / Revolut deposit
- XO-HAIR-docs documentation
- Initial onboarding (private)

✗ Not included

- Netlify hosting beyond free plan
- Paid Brevo subscription (upgrade if high volume)
- Custom domain name (e.g. xohair.fr)
- Ongoing evolutionary maintenance
- In-depth development training
- Sensitive credentials in this public repo

10. Customer journey diagram

From first click to appointment confirmation — complete client-side journey:

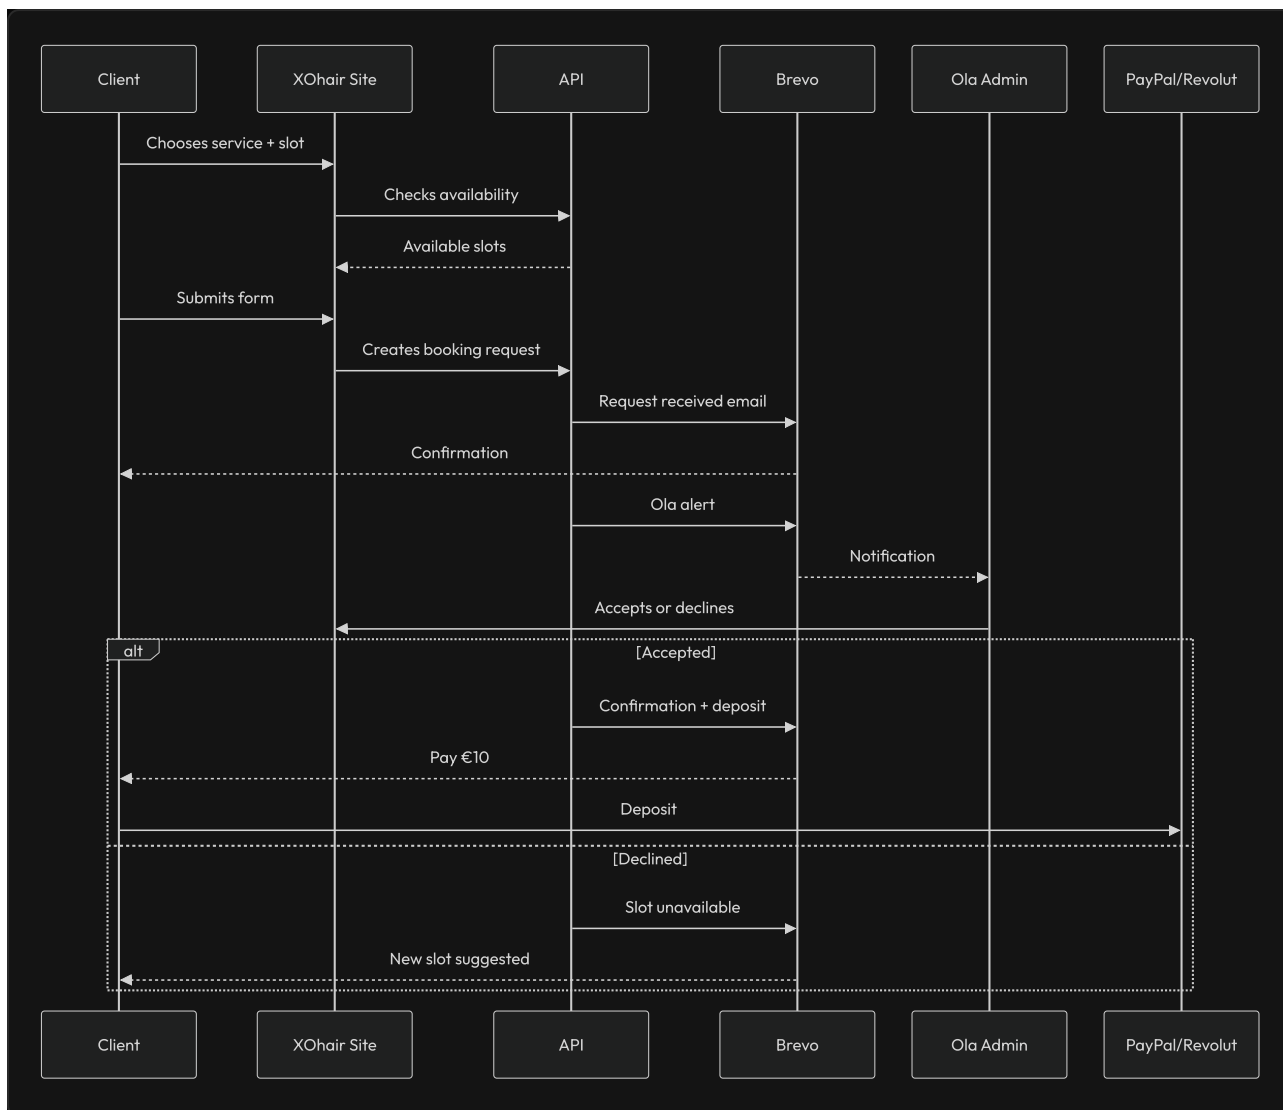

Figure 2 — Client journey from booking to confirmation

The client books independently, receives an immediate email, Ola validates from her admin, the client pays the deposit if accepted. The entire flow is automated — Ola only needs to accept or decline.

This report clarifies the real value of the XOhair project and the exceptional nature of the €200 price. It does not constitute a legal contract. For day-to-day usage, see the Ola Guide and the XO-HAIR-docs repository.
